

# Get Ready For World Currency: Hidden Agendas Unmasked

## A WORLD ON THE BRINK

The world is on the brink of a new era of currency. The rise of digital currencies and the increasing interconnectedness of the global economy are making it increasingly difficult to maintain the status quo. A major shift is coming, and it is important to be prepared for the challenges and opportunities that it will bring.

One of the most important things to understand about the coming changes to the global monetary system is that there are hidden agendas at play. Powerful individuals and institutions are working behind the scenes to shape the new system in a way that benefits them. It is important to be aware of these agendas so that you can make informed decisions about your own financial future.

## The Hidden Agendas Behind World Currency

There are a number of different hidden agendas that are driving the push for a new world currency. Some of the most common include:

\* **Control:** A new world currency would give a small group of powerful individuals and institutions control over the global economy. They would be able to dictate the value of money, set interest rates, and control the flow of capital. This would give them immense power over the lives of ordinary people. \* **Profit:** A new world currency would also be a major source of profit for the banks and financial institutions that are involved in its creation and implementation. They would be able to charge fees for transactions,

make money on the spread between different currencies, and profit from the volatility of the new currency. \* **Agenda 21:** The United Nations' Agenda 21 is a global plan for sustainable development. One of the goals of Agenda 21 is to create a new world currency that is controlled by the UN. This would give the UN immense power over the global economy and would allow it to implement its agenda without the consent of sovereign nations.

## **The Consequences of a New World Currency**

The creation of a new world currency would have a number of far-reaching consequences. Some of the most likely include:

\* **Loss of sovereignty:** A new world currency would mean that countries would lose control over their own monetary systems. This would give the global financial elite immense power over the lives of ordinary people. \*

**Economic instability:** A new world currency would be a major source of economic instability. The value of the currency would be subject to the whims of the global financial markets, and this could lead to wild swings in prices and economic growth. \* **Increased inequality:** A new world currency would also lead to increased inequality. The wealthy would be able to profit from the new system, while the poor would be left behind.

## **How to Prepare for the Coming Changes**

The coming changes to the global monetary system are a serious threat to our freedom and prosperity. It is important to be aware of the hidden agendas that are driving these changes and to take steps to protect yourself.

Here are a few things that you can do:

\* **Educate yourself:** The first step is to educate yourself about the hidden agendas behind world currency. There are a number of resources available online that can help you to understand the issue. \* **Diversify your savings:** The next step is to diversify your savings. This means holding your assets in a variety of different currencies and investments. This will help to protect you from the volatility of any one currency. \* **Prepare for a cashless society:** It is also important to prepare for a cashless society. The global financial elite is working to eliminate cash, and it is only a matter of time before they succeed. Once cash is gone, you will be completely dependent on the digital financial system. \* **Support sound money:** Finally, you can support sound money. Sound money is money that is backed by a physical asset, such as gold or silver. Sound money is not subject to the whims of the financial markets, and it cannot be created out of thin air.

By taking these steps, you can protect yourself from the coming changes to the global monetary system. You can ensure that your financial future is secure, and you can help to preserve your freedom and prosperity.

The coming changes to the global monetary system are a serious threat to our freedom and prosperity. It is important to be aware of the hidden agendas that are driving these changes and to take steps to protect yourself. By educating yourself, diversifying your savings, preparing for a cashless society, and supporting sound money, you can ensure that your financial future is secure.
