Facts about Sunflowers

*

Sunflowers are the tallest flowers in the world. The tallest sunflower ever recorded was over 30 feet tall!

*

Sunflowers are native to North America. They were first domesticated by Native Americans, who used the seeds for food and oil.

*

Sunflowers are a member of the daisy family. This means that they are related to other popular flowers, such as daisies, zinnias, and marigolds.

*

Sunflowers have a unique ability to track the sun. Their heads will follow the sun throughout the day, ensuring that their flowers are always facing the sun's rays.

*

Sunflowers are a good source of food for birds and other wildlife. The seeds are a favorite food of many birds, and the flowers are a popular source of nectar for bees and butterflies.

Fictions about Sunflowers

*

Fiction: Sunflowers are always yellow.

*

Fact: Sunflowers actually come in a wide variety of colors, including red, orange, purple, and even white.

*

Fiction: Sunflowers only bloom in the summer.

*

Fact: Sunflowers can actually bloom at any time of the year, as long as the weather is warm enough.

*

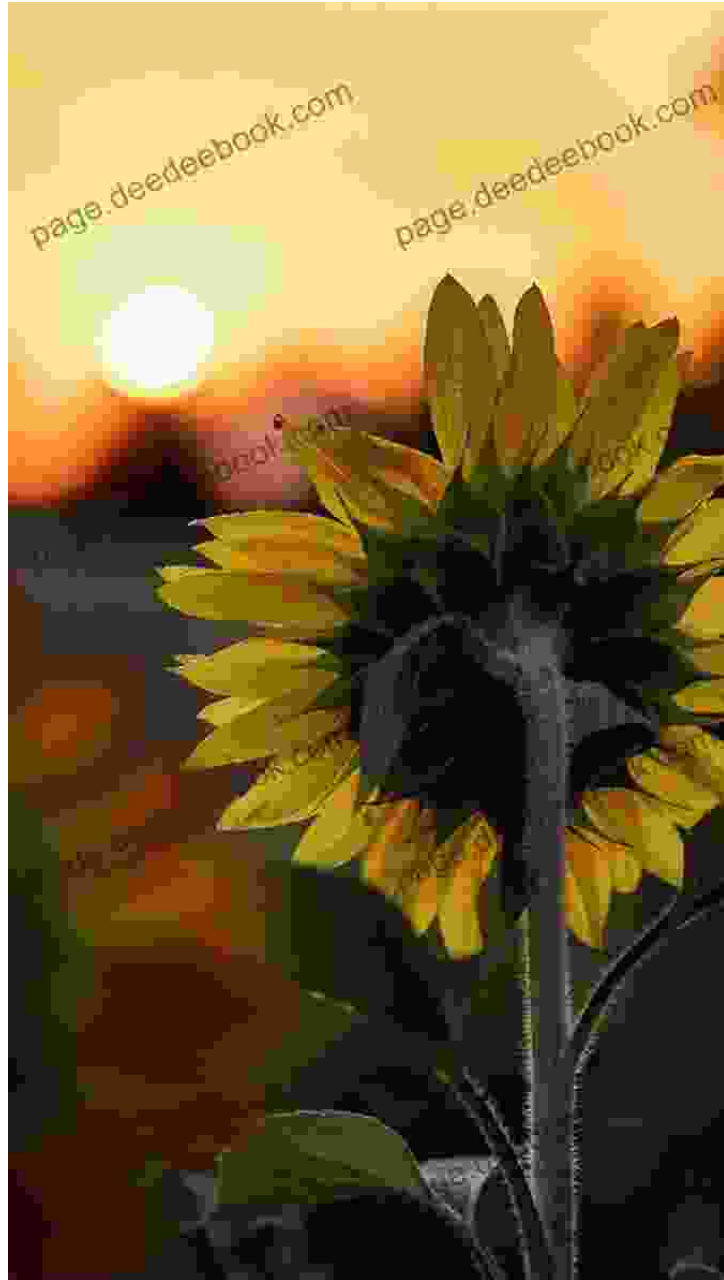

Fiction: Sunflowers are poisonous.

*

Fact: Sunflowers are not poisonous, and the seeds are actually a good source of food. However, the leaves and stems of the plant can be toxic to some animals, such as horses and cattle.
