Developed by experienced shearers, the Razzle Dazzle method involves a unique combination of shearing techniques, specialized equipment, and a keen understanding of sheep handling. By following this method, shearers can significantly improve their shearing speed and accuracy, resulting in premium-quality wool and enhanced animal well-being.

Step-by-Step Guide to the Razzle Dazzle Method

1. **Preparation:** Gather necessary equipment, including shearing combs and cutters, wool handling bags, and handling pens. Ensure the shearing area is clean, well-lit, and free of distractions.
2. **Sheep Handling:** Gently restrain the sheep in a shearing cradle or on a table. Position the sheep comfortably to provide ample space for shearing and to minimize discomfort.
3. **First Cut:** Begin shearing from the shoulder area, using a wide comb to remove the bulk of the wool. Hold the clippers firmly and guide them smoothly along the sheep's contours.
4. **Body Shearing:** Use a medium comb for the body, maintaining a consistent angle and pressure. Work systematically from the shoulder to the hindquarters, following the natural grain of the wool.
5. **Razzle Dazzle Technique:** For the legs, belly, and other challenging areas, employ the "Razzle Dazzle" technique. Use a small comb and alternate quick, short strokes with gentle combing movements.
6. **Second Cut:** Shear the remaining wool closer to the skin, using a fine comb or a combination of combs. Pay attention to details and remove any missed patches.
7. **Finishing Touches:** Inspect the sheep for any missed spots or uneven cuts. Use a finishing comb to smooth the edges and create a clean, professional finish.

Shearing Tips for Precision and Efficiency

- Maintain a sharp cutting edge on clippers to ensure clean cuts.

- Hold the clippers at a slight angle to the wool, allowing for smooth shearing.
- Apply consistent pressure to the clippers to avoid tearing or damaging the wool.
- Follow the natural contours of the sheep's body to minimize stress and discomfort.
- Handle sheep with care and minimize any sudden movements that could startle them.
